DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-8, and 10-14, drawn to a storage organizer system, classified in class 211, subclass 90.04.
- II. Claim 15, drawn to a storage organizer system, classified in class 211, subclass 94.01.
- III. Claims 16-18, drawn to a storage organizer system, classified in class 211, subclass 87.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as use without at least two upright panels. It is noted that claim 15 only functionally recites the panels (see the last 3 lines). See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as use without a cut-out free rear edge. See MPEP § 806.05(d).

separately usable. In the instant case, invention III has separate utility such as use without a cut-out free rear edge. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

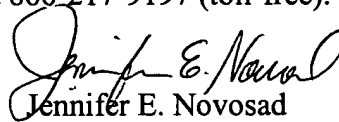

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
